

Welcome to Ammonit

Presentation New Data Logger Meteo-40

It will be available in early 2011

Ammonit Data Logger-Meteo 40

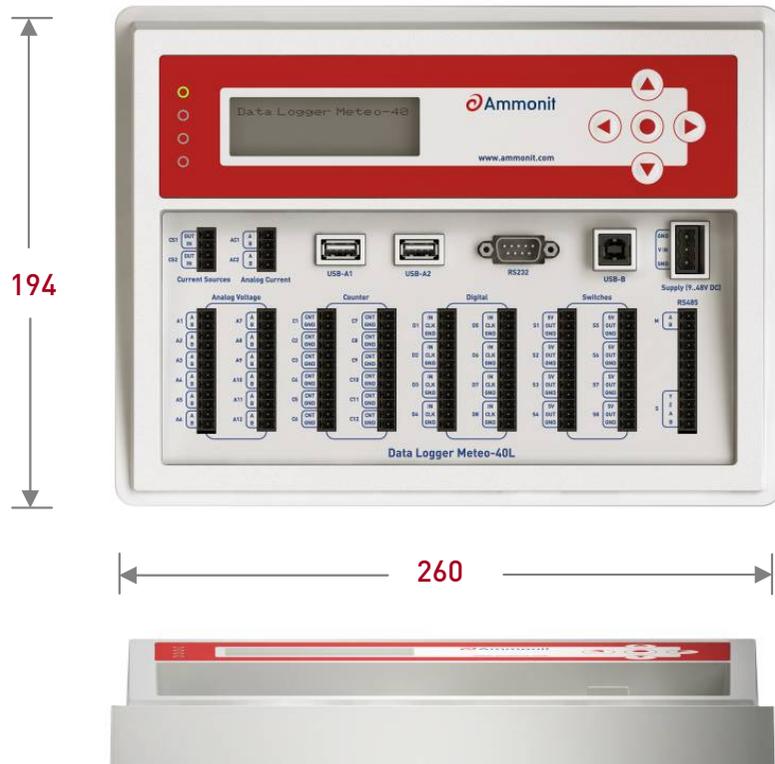

Launch at Husumwind 2010 – Available in early 2011

Meteo-40: a new data logger generation with powerful features

Ammonit Data Logger-Meteo 40

Dimensions: 260 (l) x 194 (w) x max. 50mm (h)

Fits into a standard Ammonit steel cabinet, incl. logger accessories

Ammonit Data Logger-Meteo 40

Two configurations: Meteo-40 L (large) & Meteo-40 M (medium)

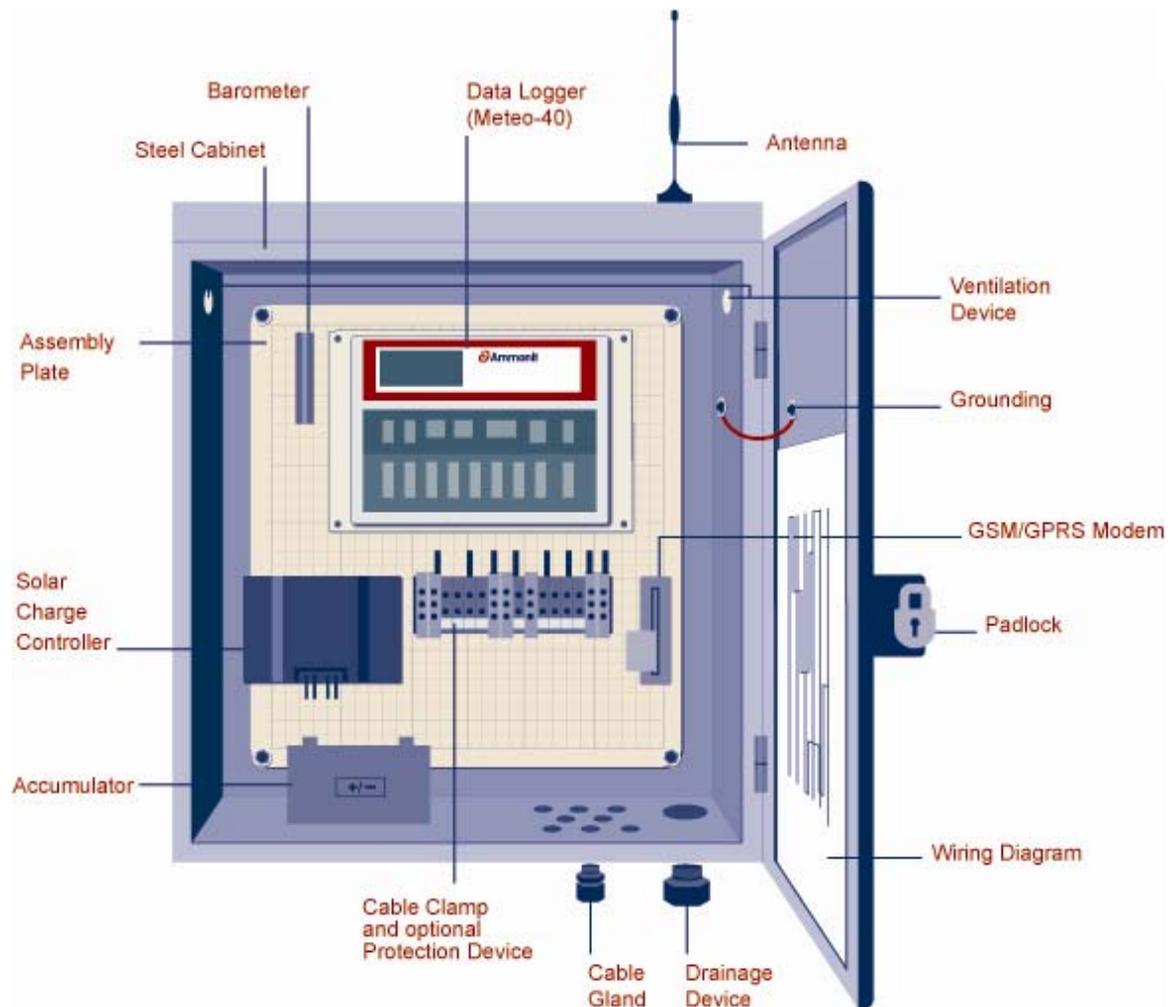

Meteo-40 L ~35 channels

Meteo-40 M ~22 channels

Ammonit Data Logger-Meteo 40

Fits into a standard Ammonit steel cabinet

Ammonit Data Logger-Meteo 40

Application / Outdoors

Ammonit Data Logger-Meteo 40

Application / Outdoors – part 1

- Applicable for:
 - wind site assessment, wind farm monitoring
 - climate research
 - solar assessment & solar monitoring
 - traffic & agricultural meteorology
- Available in two configurations:
 - Meteo-40M (medium) with ~22 channels
 - Meteo-40L (large) with ~35 channels

Ammonit Data Logger-Meteo 40

Application / Outdoors – part 2

- Suitable for all climates and the remotest regions.
- Self-contained, low maintenance & high performance.
- Designed for the toughest real-world conditions and tested in independent laboratories.
- Low power consumption, runs on 50 W solar panels.

Ammonit Data Logger-Meteo 40

Measurement Technology

Ammonit Data Logger-Meteo 40

Measurement Technology – part 1

- 2 GB memory: recording of complete 1 sec. original measurement data (approx. 1 year with typical number of sensors).
- Additional storage of aggregate data (min. 3 years).
- Many channels: ~22 (Meteo-40M) and ~35 (Meteo-40L), differential measurement.
- High resolution (~16 bit, ~8 Hz): symmetric, differential analog channels, various input ranges to choose from ($\pm 0.1V$, $\pm 1V$, $\pm 10V$).

Ammonit Data Logger-Meteo 40

Measurement Technology – part 2

- High sensitivity analog input: e.g. temperature sensor PT 100.
- Digital channel for smart sensors such as the Thies TMR vane: no mechanical wear, higher precision.
- Counter channel with AC input support allows for a combination of high quality Thies sensors with cheaper sensors, e.g. NRG sensors without adapter.

Ammonit Data Logger-Meteo 40

Communication

Ammonit Data Logger-Meteo 40

Communication

- Data communication and data exchange via HTTPS, FTP, SCP connection and email.
- Modem: GSM / CDMA / GPRS, (RS-485 / RS-232); 3 USB slots for PC-connections; adapter: WiFi, Ethernet or memory stick.
- UMTS & Bluetooth will be offered at a later stage.
- Compatibility with all SCADA systems.
- Easy connections to computer via USB cable or remote via the internet.

Ammonit Data Logger-Meteo 40

Flexibility / Convenience

Ammonit Data Logger-Meteo 40

Flexibility / Convenience - part 1

- Integrated Linux-system for maximum flexibility and adaptability.
- New structural concept makes Meteo-40 very flexible. (An application programming interface -API- to customise the data logger is planned for later Meteo-40 firmware releases).
- Web based access without the need for additional software.
- User-friendly web interface and large LC display for autonomous applications.

Ammonit Data Logger-Meteo 40

Flexibility / Convenience - part 2

- Multi-lingual configuration; Meteo-40 settings can be adjusted to a language of your choice: English, Spanish, German, French, Chinese. Additional language options will be added at a later stage.
- Accessible, modern product design.
- Custom software provided by Ammonit, on request.
- Optional: digitally signed and encrypted measurement data to prevent data falsification.

Ammonit Data Logger-Meteo 40

Channel Options:

Overview Channels	Meteo-40 M	Meteo-40 L	Applications
Switches	4	8	Sensor supply, relais (for heating)
Connectivity	(2) USB host, (1) USB device		PC; Modem; Memory Stick; Ethernet; WiFi
	(1) RS-485, Master		Smart Sensors (e.g. Ultrasonics)
	(1) RS-485, Slave		SCADA, Wind Farm Monitoring Software
	(1) RS-232		Modem
Display & Keys	(20 x 4) LC display with backlight, five keys		
Counter	8	12	Anemometers Precipitation Sensor
Digital/Status	4	8	Serial Wind Vane (e.g. TMR Vane)
Analog Voltage	8 16-bit $\pm 0.1V, \pm 1V, \pm 10V$	12 16-bit $\pm 0.1V, \pm 1V, \pm 10V$	Potentiometric Wind Vane Meteo Sensors Barometers Hygro-Thermal Sensors Pyranometers
Analog Current	1 16-bit $\pm 20 \text{ mAmp}$	2 16-bit $\pm 20 \text{ mAmp}$	PT 100 Thermometer
