Vision

A world powered by sustainable energy

Mission

To help our customers find, understand, and make energy in a more renewable and efficient way

About SR International

SR International (formerly Studio Rinnovabili) is an independently owned company that helps customers identify opportunities and threats in renewable and efficient energy projects from both a technical and business point of view. It was founded in 2004 in Rome, Italy, when the sustainable industry was in its infancy. For more than 10 years, SR International has remained dedicated to providing world-class consulting engineering and technologies. The company serves electric utilities, turbine manufacturers, renewable energy developers, research institutes, and government agencies in more than 10 countries around the world. Six core values form the foundation of the company: a commitment to environmental stewardship, fair employment, profitability, integrity, innovation, and dedication are expressed every day through the company's services and products, its recognized quality, and its innovative human resources practices. Beyond its doors, SR International works to further the development of renewable and efficient energy through education and community initiatives.

Consulting, Engineering and Technology

The company's expertise spans over consulting and engineering on wind energy, solar PV, biomass plants, mini-hydroelectric, energy efficiency, energy service company (ESCO).

In wind energy consulting and engineering SR works mainly on feasibility studies, wind and site analysis, micro-siting, remote sensing, acoustic studies, layout optimization, SODAR measurements, LIDAR measurements. Post construction services include short term forecasting (www.e4cast.it), on site testing and noise monitoring. In the solar PV field, mini-hydro and biomass, consulting include feasibility studies, energy yield, project due diligence, PV plant testing and optimization, grid connection. Engineering expertise includes DTM survey, civil works, grid connection. Energy efficiency expertise includes, energy audit, thermal assessment for buildings and engineering of heating plants, public lighting efficiency assessment, and district heating.

SR International also sells and gives training on specific software and hardware for the design of RES (Windsim and Windfarm), sells measurement equipment for anemometry (Ammonit loggers, Thies anemometers, Aqs-SODAR, Zephir-LIDAR) and sun pyranometry (Kipp & Zonen).

Markets

SR international has a consolidated position in Italy as independent consultant and engineering firm. With a watchful eye to new foreign markets, SR International operates since several years also in east of Europe, Africa and Latin American markets.

Certifications and Memberships

SR International is member of ANEV and ISES Italia. It is certified ISO 9001 (Quality) and UNI CEI 11352 (ESCO).
